Practice
Revenue

Ancillary Services Provided Include:

- Our technology solution simplifies a practice's workflow and increases revenue through covered test reimbursements.

- Implementing this type of preventative medicine and diagnostic testing delivers a higher quality of patient care while reducing future costly patient services.

- Annual Wellness Visits
- Mental Health Assessments
- Neurocognitive Assessments
- Blood Testing
- Hereditary Testing
- Urine Toxicology
- Pharmacogenetics
- Cancer Screening
- Allergy Scratch Testing
- Allergy Immunotherapy

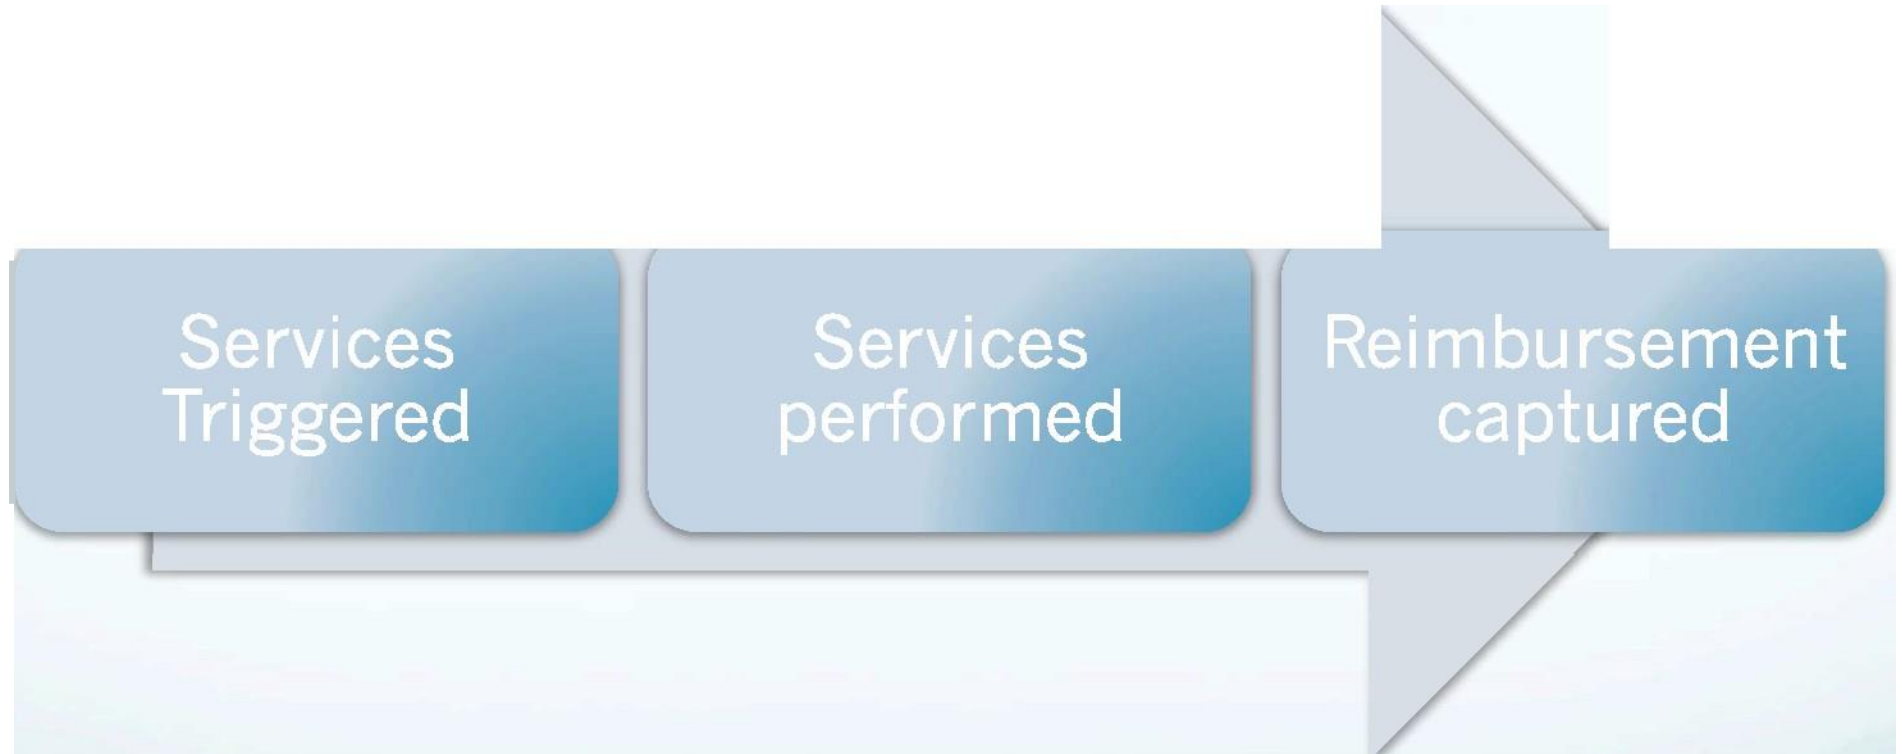

Improved Patient Outcomes

- Convenience- Combines ALL ancillary services under **1** platform and **1** portal.
- Intelligence - Assesses clinically relevant ancillary services based on medical necessity and the patients insurance. No need to think about what the patient qualifies for and needs.
- Compliance - Built by Affordable Care Act (ACA) experts and attorneys from the ground up anticipating an audit.
- Automation - Our platform allows information to move seamlessly between the tablet, the exam room, and your health record system.

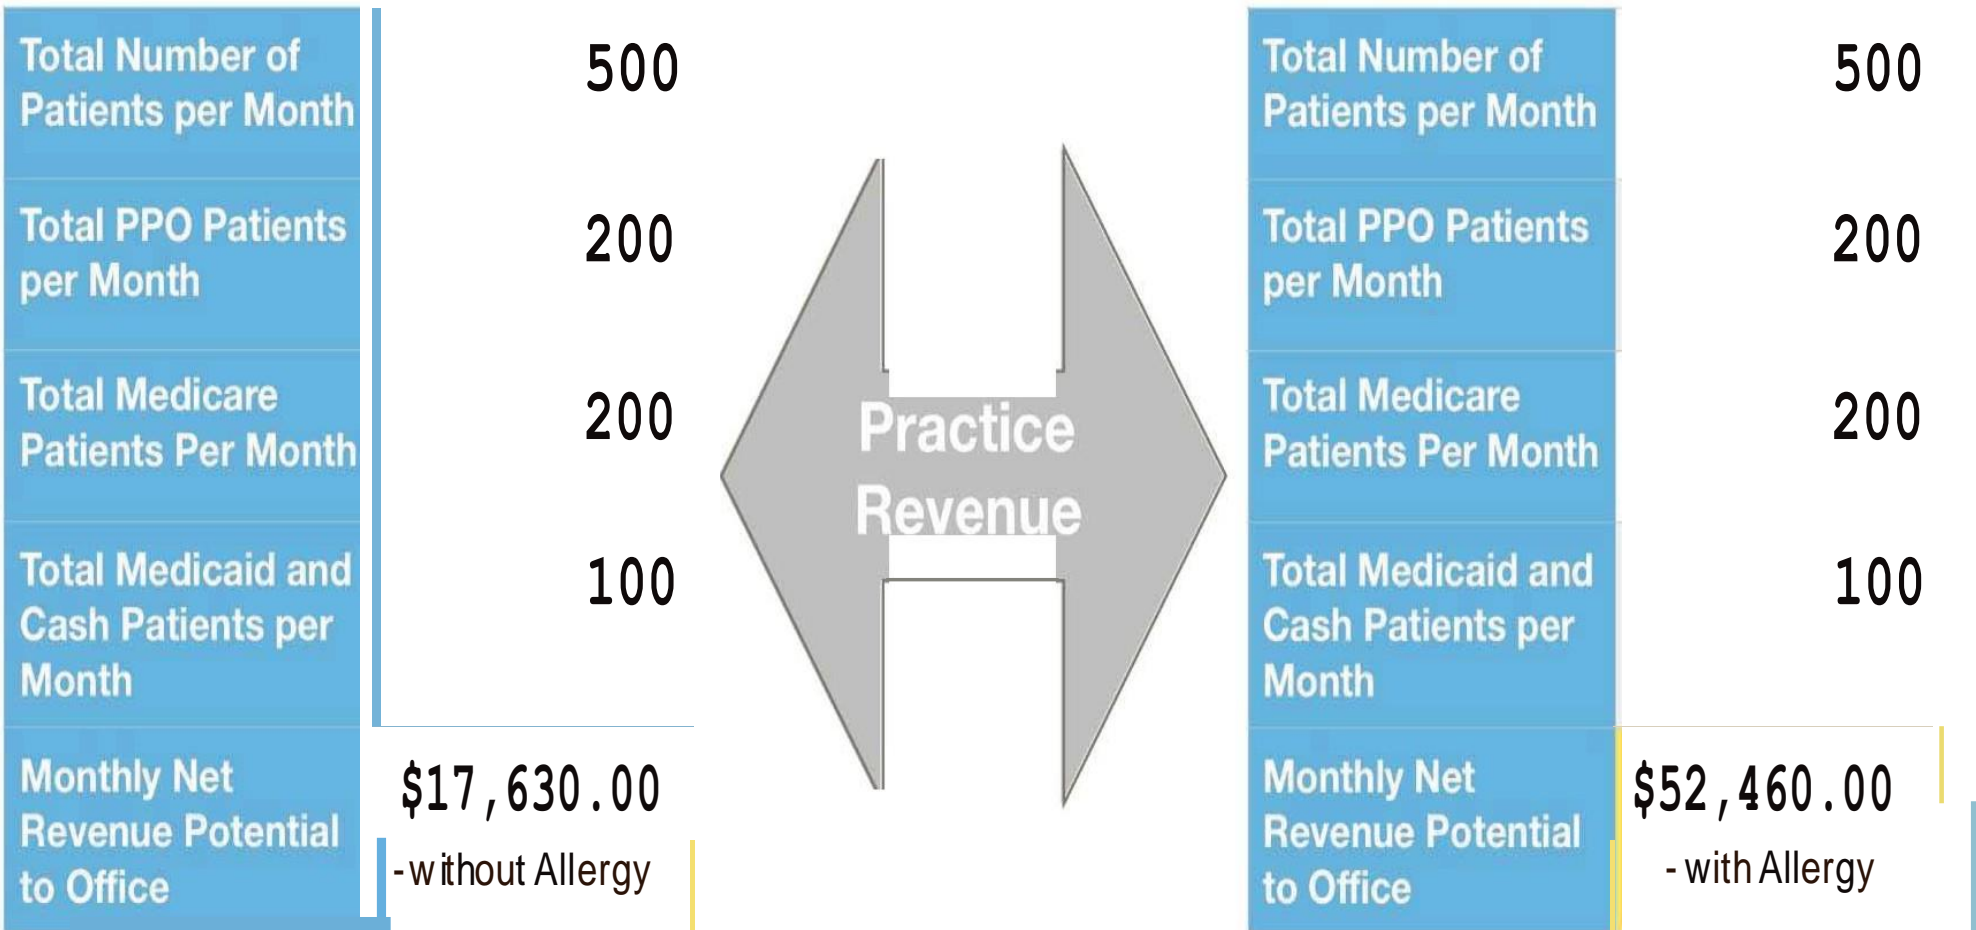

Increased Practice Revenue

- Reimbursement from the triggered medically necessary preventative tests provides increased revenue for your practice.

Revenue Examples

* approximations based off of average nationwide coverage rates & reimbursement data

Patient Example

- Betty Smith
 - 67 Years Old
 - Medicare Patient
 - Intake process uncovers:
 - Seeking Oxycodone refill for chronic pain
 - Currently uses inhaler year round and takes Claritin
 - Previous family history of breast and colon cancer
 - Struggling to remember things as she gets older

Improved Patient Outcomes Increased Practice Revenue

- Betty Smith TRIGGERED the following preventative diagnostic tests:
 - Urine Drug Screen- Due to Scheduled 2 drug refill
 - Annual Wellness Visit - Medicare (65yrs+) qualifies
 - Mental Health Assessment- All patients over age of 18 qualify for test
 - Neurocognitive Test - Demonstrated mild cognitive impairment
 - Cancer Screening – Meets Medicare requirements and is at heightened risk for hereditary cancer
 - Allergy Testing and Immunotherapy- Possible allergies based on inhaler and allergy medication
